

AIRDECO LINE

THE IDEAL SOLUTION TO IMPROVE THE INDOOR AIR IN YOUR LIVING AND WORKING ENVIRONMENT SUSTAINABLY AND EFFECTIVELY.

Especially residential and office spaces in big cities struggle with poor air quality and increased fine dust pollution. The elegant, minimalist look of the Airdeco line allows you to use it cleverly in living spaces, offices and administration.

Clean air – Nature shows us how!

The **bioclimatic** bipolar air ionisation system copies the natural processes of air purification and ensures a pleasant, healthy indoor climate through the creation of activated oxygen. The general well-being is noticeably improved: the air is freed from viruses, bacteria, germs, pollutants, micro-organisms, odour molecules, gases and mould. The

oxygen ion content is increased. The tried and tested **AIRDECO** unit series is not only convincing because of its perfect practical properties, but also because of its appearance. Graceful shapes and high-quality materials turn the primarily useful air ionisation units into elegant objects that find an attractive place in any ambience.

Effect of ionised air:

Inactivation of viruses and pathogens incl. SARS-CoV-2 by up to 99,99%

Reduction of odours, fine dust and irritants for odourless air

Safe and healthy air in living and working spaces of all kinds

Certified efficiency for your safety with every bioclimatic product

AIRDECO LINE

The units of the **bioclimatic AIRDECO** series are small beauties for use in offices, sales rooms, private living rooms, restaurants, etc. with an optically appealing design. All units are equipped with an intensity display and can be operated by plug and play. In living rooms, offices, foyers, hotels or surgeries – **AIRDECO** creates good indoor air in the most beautiful form.

AIRDECO LINE

AIRDECO Pyramid

The **AIRDECO Pyramid** is a universal, powerful small device with integrated intensity control for short or continuous use in an attractive design. It achieves the best effect when placed near a possible emission source.

Technical specifications

Dimensions	160 x 160 x 160 mm
Maximum room size	up to 30 m ² (at 2.7 m height and standard load)
Equipment	in black, silver & white

AIRDECO wall unit

As an attractive individual element or in an arrangement of several units – the elegant **AIRDECO wall units** with automatic mode and integrated intensity control are always a visual eye-catcher.

Technical specifications

Dimensions	380 x 370 x 95 mm
Maximum room size	up to 45 m ² (at 2.7 m height and standard load)
Equipment	sensor-controlled, fan included

AIRDECO floor-standing unit

Suitable places for the mobile, sensor-controlled **AIRDECO floor-standing unit** with automatic mode and integrated intensity regulator can be found almost everywhere. The fine, minimalist look allows it to be cleverly integrated into private and business environments.

Technical specifications

Dimensions	370 x 200 x 152 mm
Maximum room size	up to 45 m ² (at 2.7 m height and standard load)
Equipment	sensor-controlled, fan included

Sophisticated technology

The integrated sensor in the **bioclimatic AIRDECO** automatically regulates the intensity of the air disinfectant on the basis of a room-specific basic setting and adjusts it to the air pollution depending on the situation. This constant guarantee of the correct dosage not only ensures the best room air quality, but also energy-saving operation and maximum ease of use. Once set, the air purifier works fully automatically. The defined intensity of the ionisation is displayed via the light-emitting diode scale, which also indicates the operating status of the unit.

bioclimatic – since 1978 this means competence and experience in the field of high quality air treatment and disinfection systems for:

- Food industry
- Hotels and restaurants
- Commercial kitchens
- Office and administration
- Hospitals and medical practices
- Retirement and nursing homes
- Animal breeding and husbandry
- Private areas
- Odour-intensive businesses
- Sports and fitness areas
